PROFILE

Aspiring web developer eager to apply my skills and continuously learn through real-world challenges. Passionate about coding and problem-solving, I am seeking opportunities to enhance my programming abilities in a dynamic and collaborative environment

ADDITIONAL INFORMATION

My Hobbies Is Playing Guitar And Piano And SIng

PROJECT

JDM Car Dealership Website

- Developed key web pages (about.html, contact.html, inventory.html) to ensure a structured layout.
- Designed and implemented a grid-based inventory layout for seamless browsing of car categories.
- Integrated video background elements to enhance modern aesthetics.
- Styled pages with responsive CSS to ensure a smooth user experience.
- Maintained consistent navigation and UI elements across all pages.

TaskFlo – Task Management Web App

- Developed backend functionalities using Node.js and Firebase to handle user authentication and data storage.
- Integrated Firebase Firestore to store and manage tasks with real-time updates.
- Implemented CRUD operations (Create, Read, Update, Delete) for tasks and folders with secure Firestore queries.
- Designed and deployed Cloud Functions to automate backend processes like scheduled notifications and task updates.
- Built a secure login system using Firebase Authentication for user management.
- Configured Firebase Hosting and set up Firebase Emulator Suite for local testing before deployment.
- Ensured error handling and server-side validation for data integrity and security.
